Giving Shape to Ideas

Dispatcher Phoenix Licensing

Dispatcher Phoenix Product Overview

Dispatcher Phoenix License with Optional Packages/Nodes available

Dispatcher Phoenix Separate Licenses

Dispatcher Phoenix License

Vertical market packages can be added to the Dispatcher Phoenix base license for a **one-time fee**

Optional modules can be added to the Dispatcher Phoenix base license for a one-time fee

Enterprise license (flat fee) for failover

Dispatcher Phoenix ScanTrip

Dispatcher Phoenix Release2Me+

Upgrade Path:

Dispatcher Phoenix ScanTrip customers can upgrade directly to a fully Dispatcher Phoenix license, if needed.
More information is available here.

Dispatcher Phoenix Release2Me+ customers will be able to upgrade their license to a full Dispatcher Phoenix license with a custom quote via SEC Consulting Services

Included with the Dispatcher Phoenix license...

Collection Nodes
- DP Mobile
- Dropbox In
- FTP In
- Google Cloud Print
- Input Folder
- LPR In
- MFP Panel
- MFP User Box
- Web Capture

Processing Nodes
- Advanced OCR
- Annotate
- Color Route
- Convert to PDF
- Convert to PS
- Deskew
- Despeckle
- Insert
- Merge
- Metadata to File
- Metadata Routing
- Metadata Scripting
- Mirror Image
- Negative Image
- ODBC
- Page Count Route
- Parse & Distribute
- Parse & Insert
- Parse & Replace
- Parser
- PDF Metadata Extraction
- PJL Print Preferences
- Print to File
- Rename
- Split
- Watermark

Distribution Nodes
- Box Connector
- Dropbox Connector
- FilesAnywhere Connector
- FileAssist Connector
- FTP Out
- Google Drive Connector
- Microsoft Exchange Connector
- OneDrive Connector
- OneDrive for Business Connector
- Output Folder
- Printer
- SFTP Out
- SharePoint Connector
- SharePoint Online Connector
- SMTP Out
- WebDAV Connector

A more full featured and comprehensive workflow automation license **with OCR!**

Dispatcher Phoenix OCR Licensing

The Dispatcher Phoenix Base license now includes the Advanced OCR & Convert to PDF nodes! These nodes support the Tesseract OCR Engine.
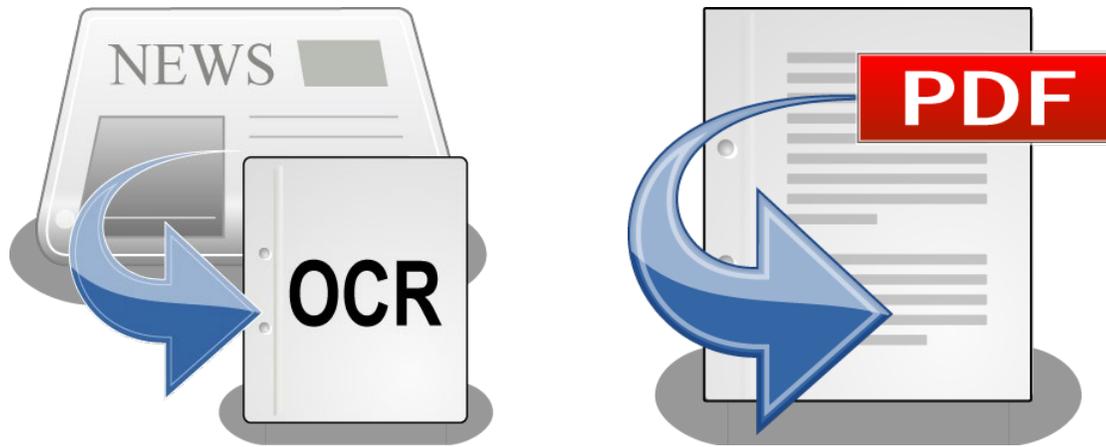

Advanced OCR & Convert to PDF

Customers can upgrade their OCR license with Kofax OmniPage!

DP OmniPage license for Convert to PDF

DP OmniPage license for Advanced OCR

If multiple OCR Engines are licensed, the user will be able to **select their preferred OCR Engine** during configuration.

Dispatcher Phoenix Perpetual License

- Dispatcher Phoenix provides a stackable license that is purchased for each unique capture source.
  - A unique capture source is any point of entry into a running or scheduled workflow. Unique capture sources are counted based upon the nodes requirements.

- The software required to run Dispatcher Phoenix is included with each base license and this license includes all basic workflow automation functionality with no limits on page volume processing.

- Standard1, 3, 5 Year Maintenance terms as well as Gold SLA options are available.

- Volume ranges are available for point of purchase discounts for quantities of 10 or more licenses.

Dispatcher Phoenix Volume Ranges
Dispatcher Phoenix (1-9 Active Inputs)
Dispatcher Phoenix (10-49 Active Inputs)
Dispatcher Phoenix (50-199 Active Inputs)
Dispatcher Phoenix (200+ Active Inputs)

- An unique capture source is a point of entry into a running or scheduled workflow (ex. 1 MFP, 1 Web Capture Device, 1 Input Folder).

- Unique capture sources are counted by:

Input Node	Folder Path	Host Name	IP Address	Print Queue	URL
Dropbox In	✓	-	-	-	-
Email In	-	✓	✓	-	-
FTP In	✓	✓	✓	-	-
Google Cloud Print	-	-	-	✓	-
HTTP In	-	-	-	-	✓
Input Folder	✓	-	-	-	-
JDF Converter	✓	-	-	-	-
LPR In	-	-	-	✓	-
MFP Panel	-	✓	✓	-	-
MFP User Box	-	✓	✓	-	-
SMTP In	-	✓	✓	-	-
Web Capture	-	✓	✓	-	-

Dropbox In
Collect files from a folder in Dropbox.

Email In
Collects files from Email Folders.

FTP In
Collects files from FTP Servers.

Google Cloud Print
Receives Google Cloud print jobs.

HTTP In
Receives documents that are uploaded through a web service.

Input Folder
Collects from local or network folders

JDF Converter
Parses information from JDF file.

LPR In
Collects print jobs from an LPR Client like the Windows Printer Queue.

MFP Panel
Allows you to initiate workflows directly from an MFP using bEST technology.

MFP User Box
Collects from MFP User Boxes

SMTP In
Receives emails sent from an MFP.

Google Cloud Print
Receives Google Cloud print jobs.

Web Capture
Capture documents from any device via a web browser.

For Dispatcher Phoenix, there are options for both standard maintenance and Gold SLA support.

| Dispatcher Phoenix Standard Maintenance Options |
| --- |
| Dispatcher Phoenix (1-9 Active Inputs) 1 Year Maintenance |
| Dispatcher Phoenix (1-9 Active Inputs) 3 Year Maintenance |
| Dispatcher Phoenix (1-9 Active Inputs) 5 Year Maintenance |
| Dispatcher Phoenix (10-49 Active Inputs) 1 Year Maintenance |
| Dispatcher Phoenix (10-49 Active Inputs) 3 Year Maintenance |
| Dispatcher Phoenix (10-49 Active Inputs) 5 Year Maintenance |
| Dispatcher Phoenix (50-199 Active Inputs) 1 Year Maintenance |
| Dispatcher Phoenix (50-199 Active Inputs) 3 Year Maintenance |
| Dispatcher Phoenix (50-199 Active Inputs) 5 Year Maintenance |
| Dispatcher Phoenix (200+ Active Inputs) 1 Year Maintenance |
| Dispatcher Phoenix (200+ Active Inputs) 3 Year Maintenance |
| Dispatcher Phoenix (200+ Active Inputs) 5 Year Maintenance |

Dispatcher Phoenix Gold SLA Options
Dispatcher Phoenix (1-9 Active Inputs) 1 Yr Gold SLA
Dispatcher Phoenix (10-49 Active Inputs) 1 Yr Gold SLA
Dispatcher Phoenix (50-199 Active Inputs) 1 Yr Gold SLA
Dispatcher Phoenix (200+ Active Inputs) 1 Yr Gold SLA
DP Office Package 1 Yr Gold SLA
DP Legal Package 1 Yr Gold SLA
DP Government Package 1 Yr Gold SLA
DP Healthcare Package 1 Yr Gold SLA
DP Education Package 1 Yr Gold SLA
DP Finance Package 1 Yr Gold SLA
DP ECM Package 1 Yr Gold SLA

*Note: There are standard maintenance and Gold SLA item numbers available for all Dispatcher Phoenix Licenses and optional modules. See the price book for a full list of maintenance options.
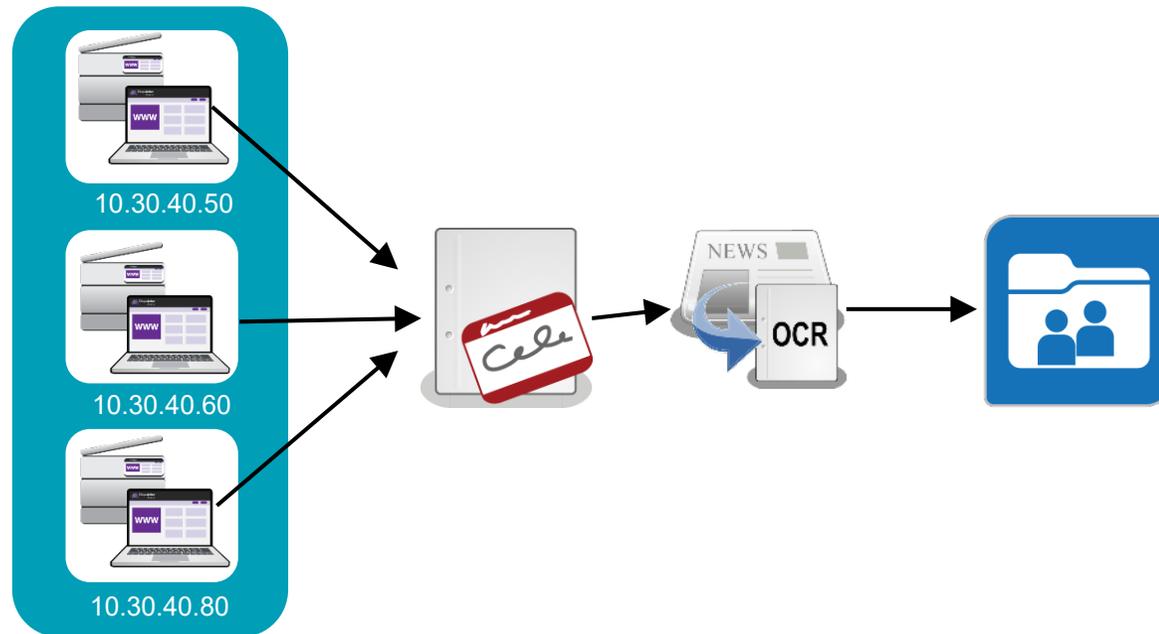

Example: 5 Dispatcher Phoenix Licenses

1st Example: 1 workflow with 5 MFP Panel nodes. Each MFP Panel node is collecting documents from a single KM device, identified by the device's IP address. In this case, **5 licenses** are used.
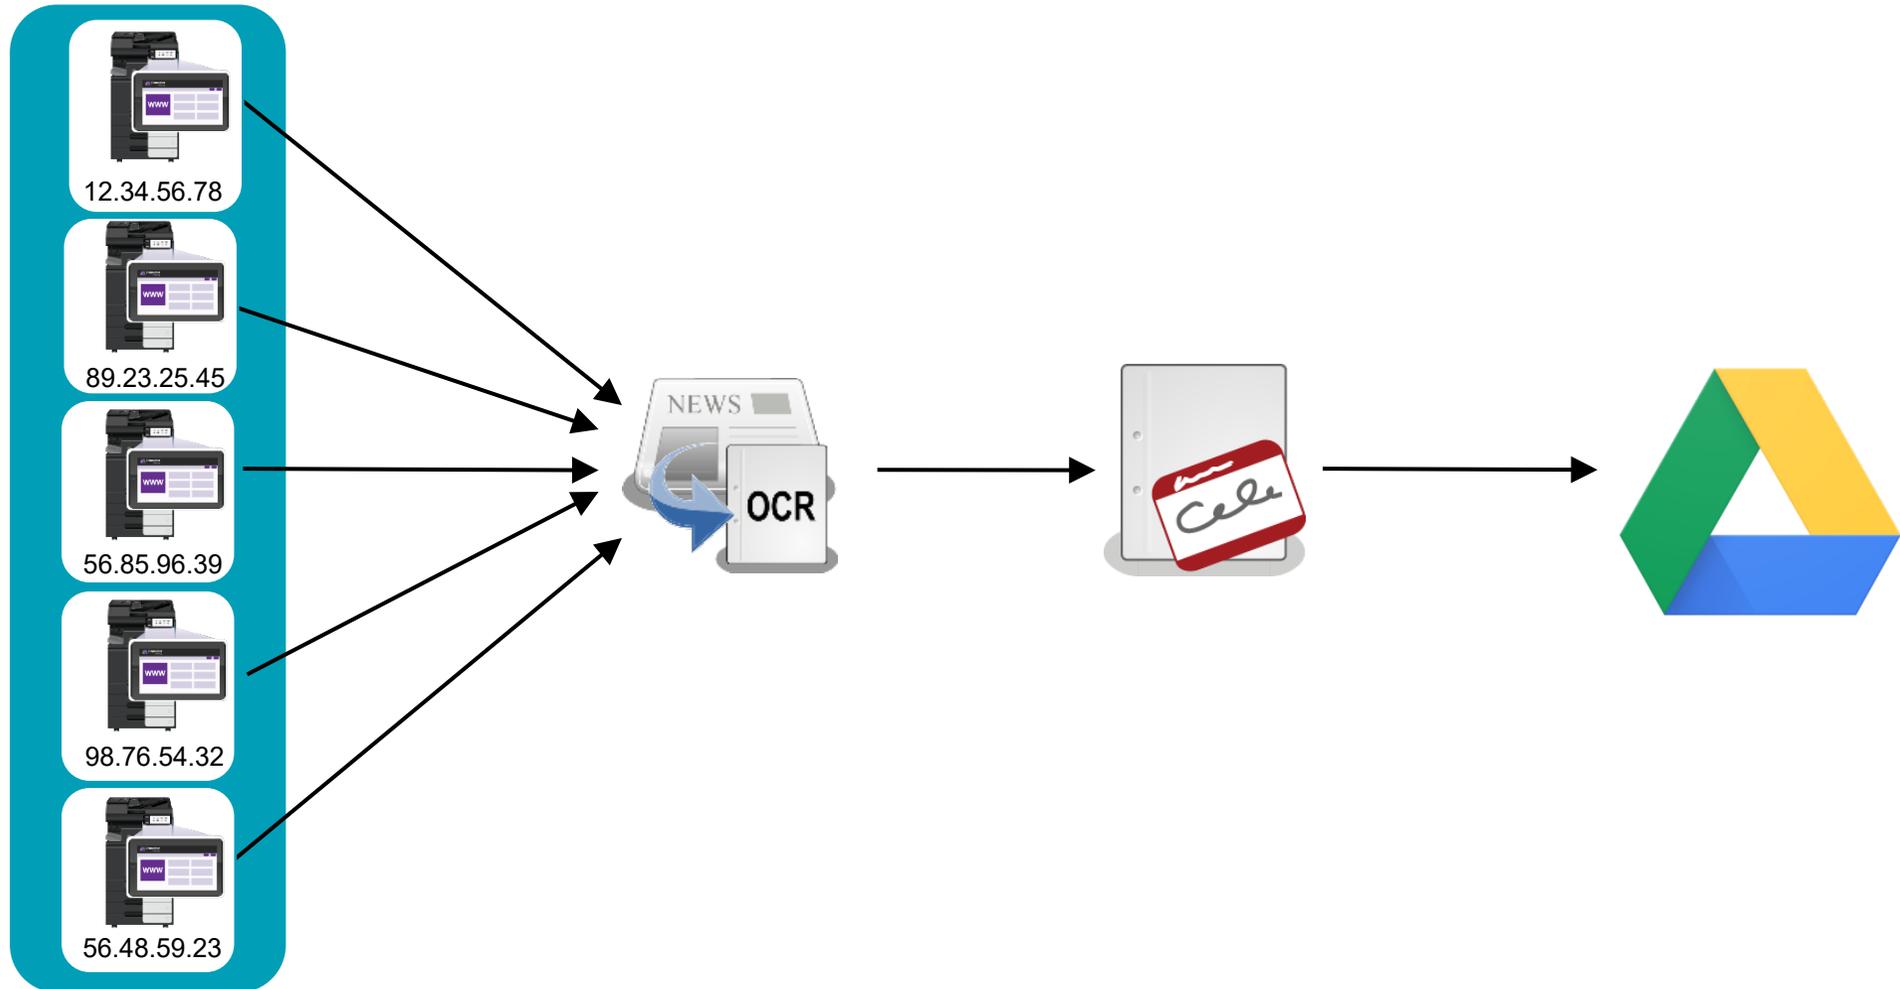

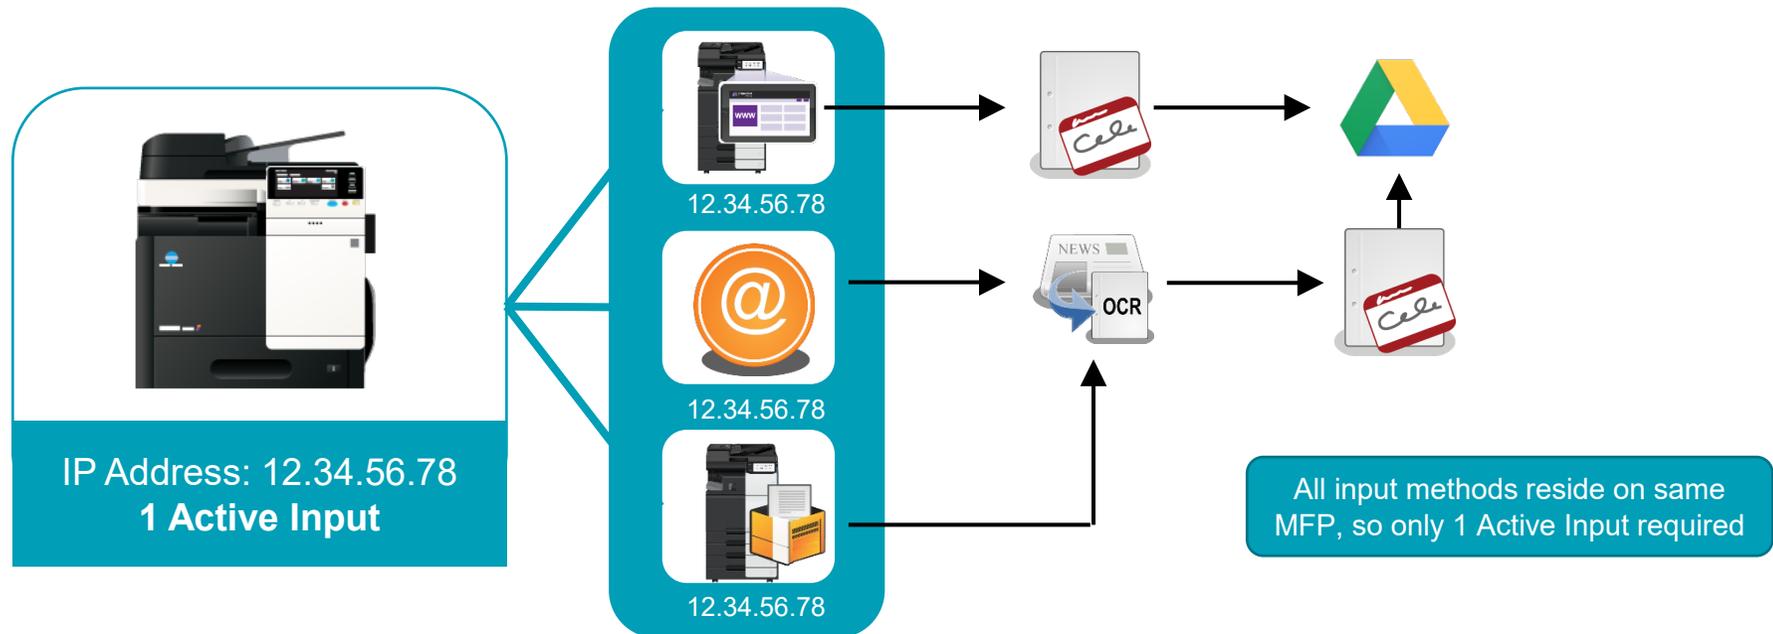

2nd Example: 1 workflow with 3 Web Capture nodes. Each Web Capture node is collecting documents from a single device such as a mobile phone, laptop, tablet, etc., identified by the device's IP address. In this case, **3 licenses** are used.

10.30.40.50

10.30.40.60

10.30.40.80

3rd Example: 1 workflow with an SMTP In node, MFP User Box node, and MFP Panel node – all collecting from the <u>SAME</u> device identified by the IP Address.

IP Address: 12.34.56.78
1 Active Input

12.34.56.78

12.34.56.78

12.34.56.78

All input methods reside on same MFP, so only 1 Active Input required

4th Example: In this example there are 5 inputs - 2 use the same MFP (IP address) meaning **4 total licenses are counted.**

Vertical Market Packages
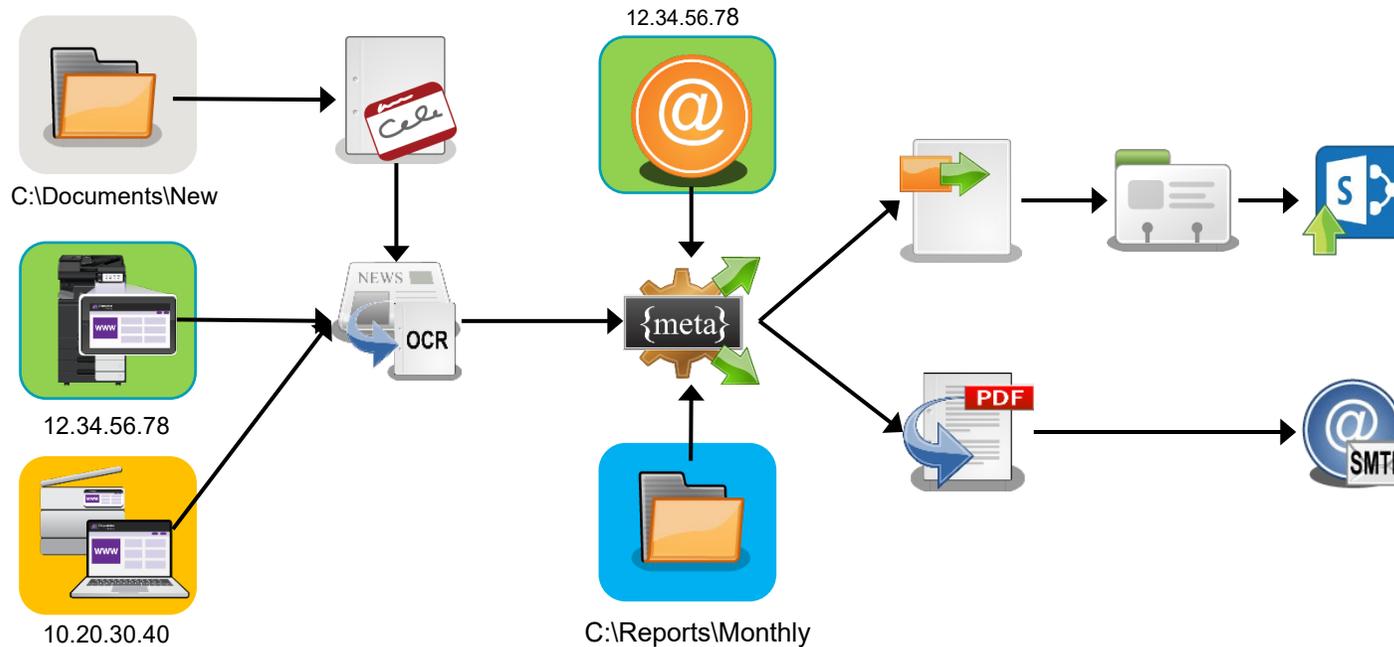

Giving Shape to Ideas

- Providing a holistic solution for our vertical-market customers.

- Optional packages are available to add on top of Dispatcher Phoenix license:

  - ***Office, Legal, Government, Healthcare, Education, Finance, and ECM.***

- 1, 3, 5 Year Maintenance terms are available.

- **All maintenance and any additional active inputs have been removed from packages.**

Optional Packages are licensed per server, not per Active Input license. For example:

To run DP + DP Office optional package on 5 MFPs, you would need:

1. Five (5) DP licenses using the 1-9 range.
2. (1) DP Office optional package.

Vertical Market Optional Packages

KONICA MINOLTA

Office Features

- Convert to Office w/ OmniPage
- OmniPage license for Convert to PDF
- OmniPage license for Advanced OCR
- Asian Font Pack

Legal Features

- Advanced Bates Stamp
- OmniPage license for Convert to PDF
- Redaction / Highlight w/ OmniPage
- Guardian Connector

Education Features

- OmniPage License for Advanced OCR
- Convert to Office w/ OmniPage
- OmniPage license for Convert to PDF

Dispatcher Phoenix Term Licensing

Giving Shape to Ideas

- Dispatcher Phoenix term licenses offer the **same functionality** as standard Dispatcher Phoenix perpetual licenses.

- Maintenance and support is included as part of the term license.

- The cost of a 12-month term license must be paid upfront.

- With Dispatcher Phoenix term licenses, customers can invest in the functionality that they need now and also continue to expand their capabilities as their organization grows.

DP Perpetual Licenses	DP Term Licenses
Software is installed on server / local computer.	Software is installed on server / local computer.
Maintenance sold separately.	Maintenance included as part of subscription/term license.
Customer owns the software.	Customer does not own their license(s).
One-time fee paid up-front.	12-month subscription paid up-front.
Software remains available even if maintenance is not renewed.	Software no longer works if subscription/term is not renewed.
Priced higher than subscription plan due to continuous license.	Lower cost than perpetual license.

Ordering Term Licenses

When ordering, please note the following:

- ALL Dispatcher Phoenix monthly term licenses must be ordered in **12-month increments.**

- Multiple base licenses must be ordered as **separate line items**.

- A note should be included on the order that the software will be installed on a new system.

- All items should be ordered with the same kind of maintenance (Regular maintenance or Gold SLA).
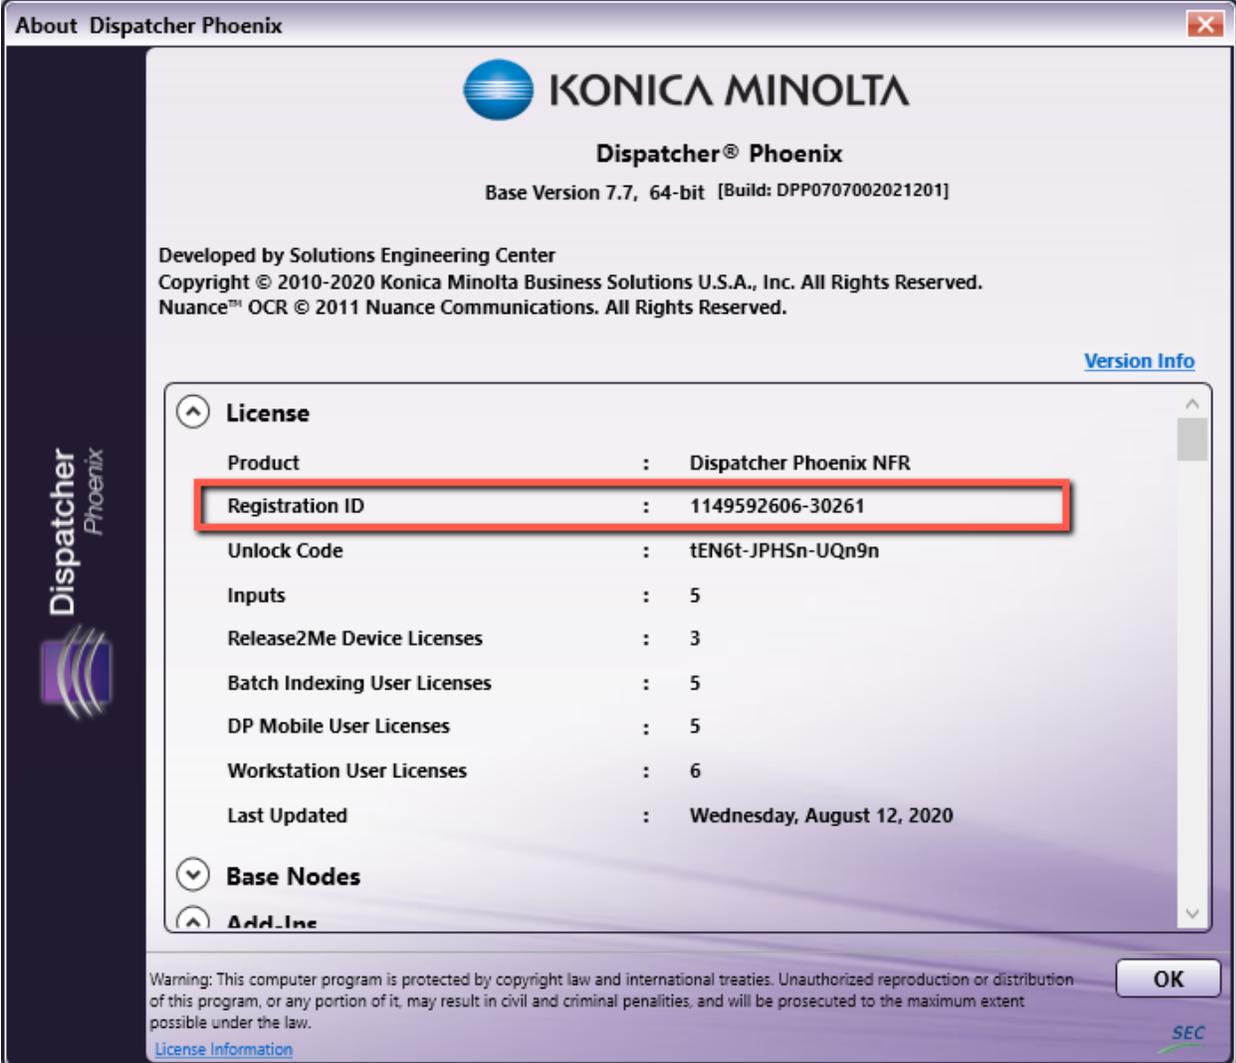

Term Licensing Example

For a customer needing Dispatcher Phoenix with the Dispatcher Phoenix Office package on 5 active inputs for 1 year, the order should contain:

Item		Quantity
7640021661	Dispatcher Phoenix (1-9 Active Inputs) with Maintenance, 1 month	12
7640021661	Dispatcher Phoenix (1-9 Active Inputs) with Maintenance, 1 month	12
7640021661	Dispatcher Phoenix (1-9 Active Inputs) with Maintenance, 1 month	12
7640021661	Dispatcher Phoenix (1-9 Active Inputs) with Maintenance, 1 month	12
7640021661	Dispatcher Phoenix (1-9 Active Inputs) with Maintenance, 1 month	12
7640021665	Dispatcher Phoenix Office Package (with Maintenance), 1 month	12

Upgrading a Term License

When adding functionality to a current term installation or renewing an expiring term license, please do the following:

– Include the **Registration ID** of the existing install in the order.

– Order add-on modules in **12-month increments**.

– Order the same maintenance plan (Regular maintenance or Gold SLA) for all items.

© KONICA MINOLTA

Dispatcher Phoenix User Licensing

Workstation, Batch Indexing, & Mobile

Giving Shape to Ideas

The following Dispatcher Phoenix features are licensed by **named user**:

- o **Dispatcher Phoenix Mobile**
  (10, 25, 50, 100, 250, 500 & 1000 User Packs)

- o **Dispatcher Phoenix Workstation**
  (1 User License & 10 User Packs)

- o **Dispatcher Phoenix Batch Indexing Package**
  (1 User License & 10 User Packs)

Note: Workstation and Batch Indexing User Licenses include all the functionality necessary to operate those features.

Dispatcher Phoenix Workstation is a dedicated scan station that supports any manufacturer's high-speed TWAIN scanning devices. Workstation features the following:

- Real-time image display
- Auto separation
- Scanned image manipulation including:
  - Drag-and-drop image reordering
  - Split
  - Merge
  - Point-and-click rescan
  - And more!

Dispatcher Phoenix Workstation provides a comprehensive batch scanning solution that is completely integrated with the Dispatcher Phoenix application. Once batches have been received and manually manipulated within the Workstation, an automated Dispatcher Phoenix workflow can process them further and/or store them in the appropriate document management system.

Workstation Licensing

- User Licenses are stackable on top of the Dispatcher Phoenix Workstation license in quantities of 1 or 10 licenses.

- A single workstation license allows 1 user to scan from their desktop or TWAIN device.

- 1, 3, 5 Year Maintenance terms are available.

For 5 employees to scan documents via Workstation you would need to add 5 Workstation User Licenses to your Dispatcher Phoenix install:

Licenses	Qt.
Dispatcher Phoenix Workstation (with 1 User License)	1
Dispatcher Phoenix Workstation 1 Additional User License	4
Dispatcher Phoenix Workstation (with 1 User License) Software Maintenance (1 yr.)	1
Dispatcher Phoenix Workstation 1 Additional User License Software Maintenance (1 yr.)	4

Dispatcher Phoenix Web's Batch Indexing app allows users to index their documents before storing them in a document management system for search and retrieval purposes later. Dispatcher Phoenix supports manual indexing using shortcut keys. In addition, index fields can also be pre-populated with data via OCR extraction and database lookups.

The Batch Indexing Package includes:

- Batch Indexing Node
- Verification Node
- 1 User License
- Reporting
- Batch Manager

Batch Indexing Licensing
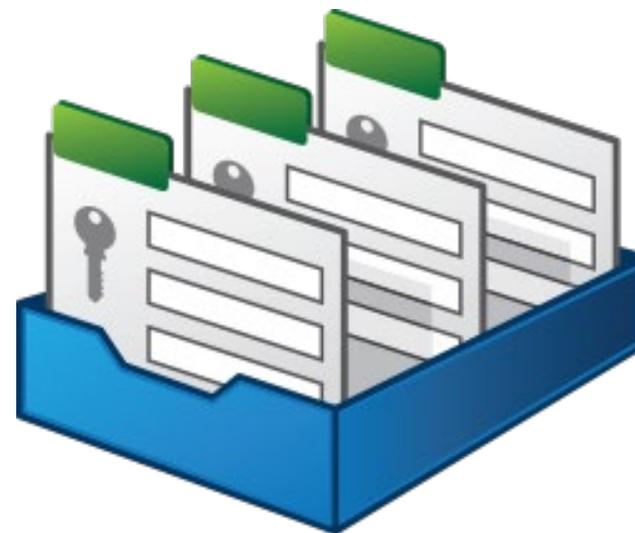

- User Licenses are stackable on top of the Dispatcher Phoenix Batch Indexing Package in quantities of 1 or 10 licenses.

- A single Batch Indexing license allows 1 user to access the Batch Indexing and Management tools in Dispatcher Phoenix Web.

- 1, 3, 5 Year Maintenance terms are available.

For 5 employees to Batch Index documents within Dispatcher Phoenix Web, you would need to add 5 Batch Indexing User Licenses to your Dispatcher Phoenix install:

Licenses	Qt.
DP Batch Indexing Package (with 1 User License)	1
Dispatcher Phoenix Batch Indexing 1 Additional User License	4
DP Batch Indexing Package (with 1 User License) Software Maintenance (1 yr)	1
Dispatcher Phoenix Batch Indexing 1 Additional User License Software Maintenance (1 yr.)	4

Dispatcher Phoenix Release2Me

Secure Print Release Licensing for Dispatcher Phoenix

Release2Me Device Licensing

The following Release2Me device licenses are optional add-in modules for the Dispatcher Phoenix Base License:

Options
DP Release2Me 1 Device License
DP Release2Me 3 Device License
DP Release2Me 5 Device License
DP Release2Me 10 Device License
DP Release2Me 25 Device License
DP Release2Me 50 Device License
DP Release2Me 100 Device License
DP Release2Me 500 Device License

- Release2Me Device licenses can be added to enable secure print release on any Konica Minolta MFPs.

- Release2Me Device licenses include ALL Release2Me functionality include Print Reporting and Print Delegation.

**Active Inputs can be used for scanning AND releasing print jobs.
For example:**

Active Input

Device License

Device License

Device License

A customer with 4 devices can use 1 Dispatcher Phoenix License + 3 Release2Me Device Licenses to enable secure print release on all 4 devices. In addition, with this configuration, the customer will be able to scan into a Dispatcher Phoenix workflow via a single device.

Example: Release2Me using Active Inputs

A customer has 4 Dispatcher Phoenix Licenses and wants to enable secure print release on 5 Konica Minolta Devices

To enable **secure print release on ALL 5 devices**, they will need to purchase ONE Dispatcher Phoenix Release2Me device license. The device license will enable all Release2Me functionality across the platform, including the system workflow, Print Delegation and Print Reporting, while also allowing for secure print from one additional device.

Dispatcher Phoenix
Enterprise Licensing

Giving Shape to Ideas

Planning for an Enterprise Installation

To properly plan for an enterprise-wide deployment of Dispatcher Phoenix, you must:

1. **Identify your customer goals.**
   How will they use Dispatcher Phoenix? What additional features will they use in the future? How many devices do they use?

2. **Identify their high availability requirements.**
   Do they require failover capabilities? Do they need to eliminate a single point of failure? Are they looking for optimal performance via offloading?

3. **Understand the proper architecture for the deployment.**
   Once you understand how your customer will be using Dispatcher Phoenix and what features they need to use, then you can determine the proper architecture for the deployment.

   Have questions? Email sec@kmbs.konicaminolta.us!

SEC

Dispatcher Phoenix offers enterprise-level features to keep your information flowing, maximize your uptime, and address your security and scalability concerns.

- **Failover & High Availability**
  Be assured that if any primary servers go down, the failover will instantly pick up the workload without missing a beat. And best of all, it does it all automatically.

- **Offload & Load Balancing**
  To speed processing time, intensive processing tasks can be offloaded to other servers. Offloading options can be purchased for several pieces of Dispatcher Phoenix including:
  - MFP Connectivity
  - Mobile Connectivity
  - Web Connectivity
  - Workflow Processing

*For additional information, download our **Enterprise White Paper**!*

Failover Licensing
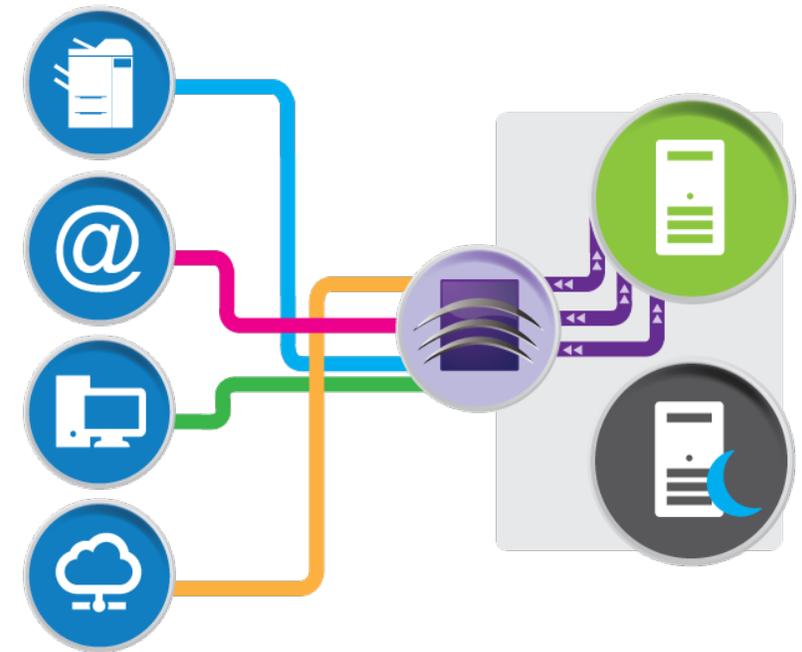

A failover server is used if the primary server goes down, ensuring maximum up-time. When a failure occurs on one server in a cluster, resources are redirected and the workflow is redistributed to another server in the cluster, which has been licensed as a failover system.

To support Failover/High Availability installations, the following licensing options are available:

Licenses
Dispatcher Phoenix Enterprise license
Dispatcher Phoenix Enterprise license 1 Year Maintenance
Dispatcher Phoenix Enterprise license 3 Year Maintenance
Dispatcher Phoenix Enterprise license 5 Year Maintenance

For additional information, download our Enterprise White Paper!

Offloading Licensing

To increase the efficiency of servers and improve application performance, you can set up a cluster for offloading in which workflows, processes, and other jobs are run on other servers.

Dispatcher Phoenix offers the following types of offload licensing:

- **MFP**. Traffic from the MFP is sent to a different server.
- **Mobile**. Traffic from the Dispatcher Phoenix Mobile app is sent to a different server.
- **Web**. Traffic from the Dispatcher Phoenix Web application is sent to a different server.
- **Workflow Processing**. Workflow processing is sent to a different server. There are two different workflow offload licenses available:
  - **Advanced**. This server is used to offload all workflow processing, including Convert to PDF, Convert to Office, Advanced OCR, Redaction/Highlight/Strikeout, Barcodes (Standard and 2D), Asian Fonts, etc.
  - **Basic**. This server can be set up to run all other workflows/processes, including output connectors, non-OCR related processing nodes, Release2Me, Batch Indexing, etc.

Note: An Offload server requires at least one primary in the cluster to be running. Offload servers can never run as the primary server.

*For additional information, download our **Enterprise White Paper**!*

Dispatcher Phoenix ScanTrip

For Scan-to-Cloud Workflows

ScanTrip Product Overview

ScanTrip is a stackable, standalone license that provides the powerful functionality organizations need for core scanning workflows.
With ScanTrip, the following workflows are available:

- Scan to Home

- Scan to Me

- Scan to the Cloud

ScanTrip Configuration	Processing Nodes	Input & Output Capabilities
Client Application	Rename	MFP Panel
Workflow Builder Tool	Advanced OCR	Web Capture
LiveFlo Technology	Metadata to File	Cloud Connectors
Dispatcher Phoenix Web	Metadata Route	Output Folder
Workflow Scheduler		SMTP Out
Sample Workflows		MS Exchange Connector
Integrated MFP Simulator		

Dispatcher Phoenix ScanTrip includes a variety of connectors to popular document management systems and cloud storage applications including:

- Box
- Dropbox
- FilesAnywhere
- FileAssist
- Google Drive
- OneDrive
- OneDrive for Business
- SharePoint
- SharePoint Online
- WebDAV

KONICA MINOLTA

ScanTrip Licensing

- Small number of items to speed and simplify the ordering process.

- Choose the number of MFPs that you want to scan from PLUS 1 Year of maintenance for each device and you're done.

- Low cost, convenient solution transforms your MFP to an on-ramp to the cloud.

ScanTrip Licenses
Dispatcher Phoenix ScanTrip (1-49 Devices)
Dispatcher Phoenix ScanTrip (50+ Devices)
Dispatcher Phoenix ScanTrip (1-49 Devices) 1 year Maintenance
Dispatcher Phoenix ScanTrip (50+ Devices) 1 Year Maintenance

Advanced Document Processing

Dispatcher Phoenix ScanTrip includes basic zonal OCR support for the Tesseract OCR Engine.

Rename

Advanced OCR

**Metadata to File**

Now with the ScanTrip license you can:
- Automate document conversion to Searchable PDF.
- OCR scanned documents and extract data.
- Dynamically rename documents.
- Export index form and OCR metadata.

...at no additional cost!

In this example, the customer has a fleet of 10 MFPs that all need to support scan-to-cloud workflows.

Licenses	Qt.
Dispatcher Phoenix ScanTrip (1-49 Active Inputs)	10
DP ScanTrip Maintenance	10
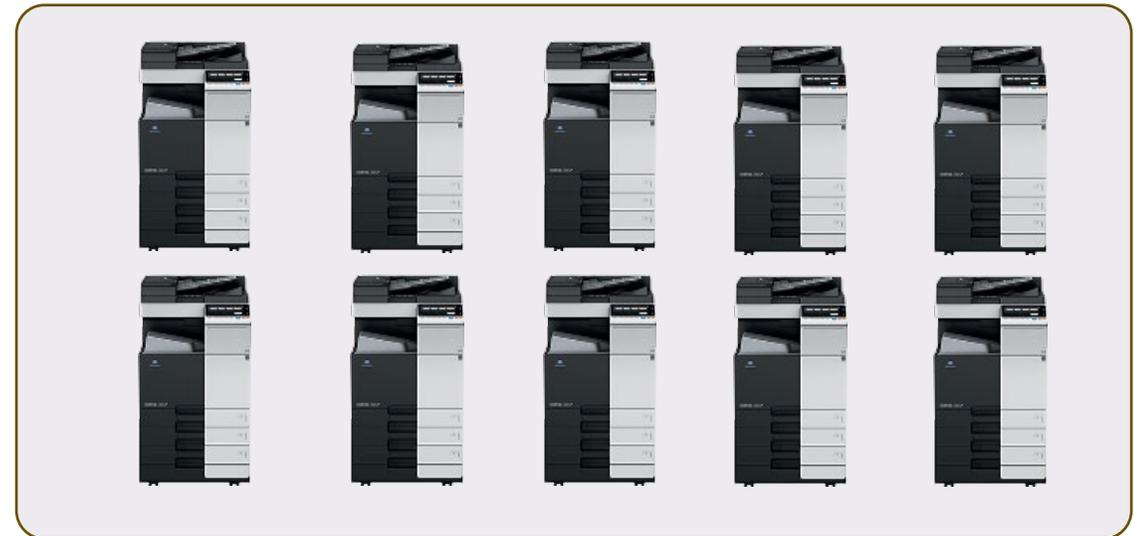

Upgrading ScanTrip to Dispatcher Phoenix Base

A customer needing access to more advanced workflow automation functionality can upgrade their Dispatcher Phoenix ScanTrip licenses to a full Dispatcher Phoenix base license!

When ordering please note the following:

- Software maintenance must be active in order to upgrade.

- All existing ScanTrip licenses must be upgraded to Dispatcher Phoenix and software maintenance must be included for every active input.

- The same amount of software maintenance must be ordered for all active inputs.

- If needed, a co-term will be completed as part of the upgrade process when current maintenance expiration dates do not match. Professional services fees may apply.

Item #	Description
7640021911	ScanTrip (1-49) Upgrade to Dispatcher Phoenix
7640021912	Scantrip (1-49) Upgrade 1 yr Maintenance
7640021913	ScanTrip (1-49) Upgrade 1 yr Gold SLA
7640021914	ScanTrip (50+) Upgrade to Dispatcher Phoenix
7640021915	ScanTrip (50+) Upgrade 1 yr Maintenance
7640021916	ScanTrip (50+) Upgrade 1 yr Gold SLA

Dispatcher Phoenix Release2Me +

For Secure Print Release and Scanning

Introducing Release2Me+ for Secure Print Release and Scan To Workflows

Release2Me+ provides a cost-effective, powerful, easy-to-use solution for secure print release and scan-to-cloud workflows.

Release2Me+ Configuration	Document Processing Functions	Input & Output Capabilities
Release2Me Secure Print Release	Rename	LPR In
Release2Me Print Reporting	Advanced OCR	MFP Panel
Release2Me Print Delegation	Metadata to File	Web Capture
Release2Me System Workflow	Metadata Route	Cloud Connectors
Client Application	Release2Me	Output Folder
Workflow Builder Tool		SMTP Out
LiveFlo Technology		MS Exchange Connector
Dispatcher Phoenix Web		
Workflow Scheduler		
Sample Workflows		
Integrated MFP Simulator		

Dispatcher Phoenix Release2Me+ includes a variety of connectors to popular document management systems and cloud storage applications including:

- Box
- Dropbox
- FilesAnywhere
- FileAssist
- Google Drive
- OneDrive
- OneDrive for Business
- SharePoint
- SharePoint Online
- WebDAV

Advanced Document Processing

Dispatcher Phoenix Release2Me+ includes basic zonal OCR support for the Tesseract OCR Engine!

Rename

Advanced OCR

Metadata to File

Now with the Release2Me+ license you can:
- Automate document conversion to Searchable PDF.
- OCR scanned documents and extract data.
- Dynamically rename documents.
- Export index form and OCR metadata.

...at no additional cost!

Release2Me+ Licensing

- Small number of items to speed and simplify the ordering process.
- Choose the number of MFPs that you want to scan from PLUS 1 Year of maintenance for each device and you're done.

Licenses
Dispatcher Phoenix Release2Me+ (1-49 Devices)
Dispatcher Phoenix Release2Me+ (50+ Devices)
Dispatcher Phoenix Release2Me+ (1-49 Devices) 1 year Maintenance
Dispatcher Phoenix Release2Me+ (50+ Devices) 1 Year Maintenance

In this example, the customer has a fleet of 10 MFPs that all need to support secure printing and cloud scanning workflows.

Dispatcher Phoenix 7.0	Qt.
Dispatcher Phoenix Release2Me+ (1-49 Active Inputs)	10
Dispatcher Phoenix Release2Me+ (1-49 Active Inputs) Maintenance 1 year	10

Dispatcher Suite Licensing

A Comprehensive Solution for Print Management
and Workflow Automation

Dispatcher Suite is designed to meet the advanced requirements a customer has for a comprehensive print management and a document workflow solution.

The software integrates two standalone applications:

Dispatcher *Paragon*

Dispatcher *Phoenix*

An enterprise print management solution

Konica Minolta's award-winning workflow automation solution

Dispatcher Suite Licensing Overview

- Activating Dispatcher Suite software requires two separate activation keys: one for Dispatcher Paragon and one for Dispatcher Phoenix.

- Dedicated item codes and a dedicated licensing scheme have been established for Dispatcher Suite to provide a cost-effective, convenient, integrated, and scalable solution for our customers.

- One year (+) of maintenance is required with all new installations.

- The Dispatcher Suite price list - with discounted pricing for Paragon and Phoenix - can ONLY be utilized if Paragon and Phoenix are purchased at the same time at a 1:1 ratio.

Dispatcher Phoenix Licensing

- A Dispatcher Phoenix Base license is needed for every device, or active input, connected to Dispatcher Phoenix.
  Note: the same principles for counting base licenses for regular Dispatcher Phoenix apply.

- The Dispatcher Phoenix Office Option Package is required for Dispatcher Suite orders.

- Software maintenance is required for all Dispatcher Phoenix items.

Dispatcher Phoenix for Dispatcher Suite
Dispatcher Phoenix Base License (when purchased with Paragon) for 1-49 Active Inputs
Dispatcher Phoenix Base License (when purchased with Paragon) for 50-199 Active Inputs
Dispatcher Phoenix Office Package (when purchased with Paragon)

In this example, the customer has a fleet of 35 MFPs that all need to support Dispatcher Paragon, while only 20 should be equipped with Dispatcher Phoenix. Those 20 devices are eligible for Dispatcher Suite pricing.
