TECHNOLOGY

INTEGRATED DOCUMENT WORKFLOW SOLUTION **FOR STATE AND FEDERAL AGENCIES.**

Dispatcher Phoenix provides all the tools you need to optimize your workflow.

At a time of shrinking budgets, rising costs and increasing expectations, government agencies are naturally looking for new ways to increase productivity, streamline processes and serve the public with the greatest speed, accuracy and efficiency. Konica Minolta's Dispatcher Phoenix provides government employees with the tools they need to handle their documents – quickly, efficiently and securely.

SOLUTIONS

TO SIMPLIFY DOCUMENT WORKFLOWS.

Automate government business processes, reduce costs, and bring new levels of efficiency to employees.

Dispatcher Phoenix, state and federal employees can have instant access to the information they need while complying with security regulations. And manual document processes can be automated, reducing the risk of human error while optimizing operational efficiency.

A wide range of powerful features.

FAST, EFFICIENT DOCUMENT DISTRIBUTION.

Dispatcher Phoenix automatically collects, processes and distributes government documents such as records, applications, cross-agency communications and other filings to multiple outputs – all in a single step. Files can be sent to network/local folders, email recipients, printers, and popular document management systems such as Microsoft SharePoint.

INTEGRATION WITH SECURE INFRASTRUCTURE.

Through Konica Minolta MFPs, Dispatcher Phoenix integrates with the federal government's smart card platform to provide a seamless, secure solution that addresses federal security concerns and mandates. With support for both authentication via CAC and PIV cards and Active Directory, Dispatcher Phoenix meets the Two-Factor Homeland Security Presidential Directive known as HSPD-12. Dispatcher Phoenix also supports FIPS (Federal Information Processing Standard) 140-2 compliance encryption, a series of important standards for government agencies, contractors, and other heavily regulated industries to protect sensitive, unclassified information.

PROTECTING DOCUMENTS.

Along with CAC/PIV authentication, other security features included in Dispatcher Phoenix's optional Government package include:

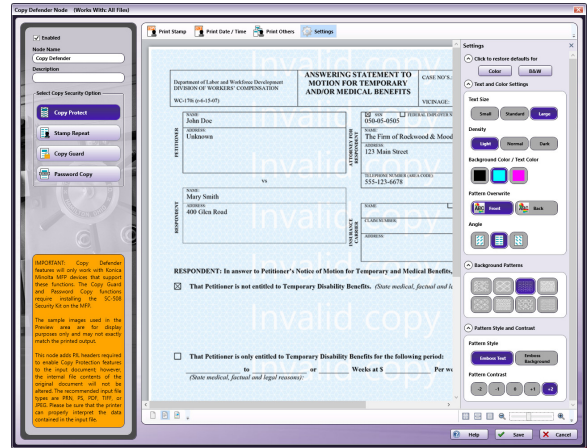

- Copy Defender process to prevent unauthorized copying of confidential documents.
- Intelligent redaction, which permanently removes personal information from documents.
- File conversion to password-protected PDFs.
- Fully integrated support for Microsoft Windows local and domain policies for security audit and tracking.

STREAMLINING GOVERNMENT WORKFLOWS.

To help state and federal agencies as well as public sector organizations optimize workflow efficiency, Dispatcher Phoenix includes automated processes that get the job done quickly and accurately. You can make information instantly retrievable by converting paper-based files into PDF Searchable. Read and route invoices based on barcode. Edit scanned images by converting files to Microsoft Office formats, such as Word or Excel. Rename files at the MFP. Other advanced automated processes include zonal OCR for data extraction, metadata routing, ODBC connectivity for integration with common databases – and much more.

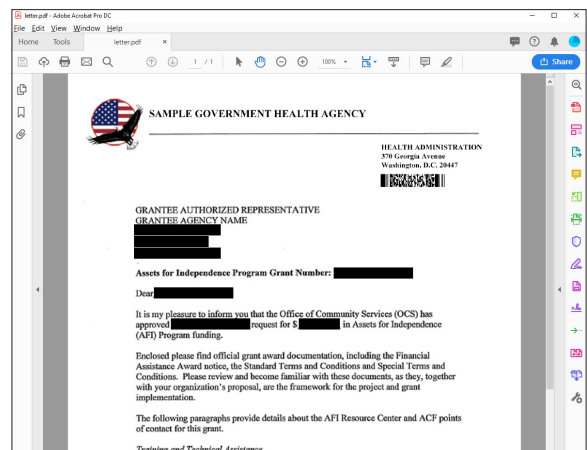

ADVANCED CONNECTIVITY.

The optional package designed for government agencies includes connectors to Laserfiche and Microsoft SharePoint for document storage, accessibility and collaboration. Files can be automatically distributed to Laserfiche, SharePoint or directed to either platform at the MFP during time of scanning. Just scan, index, and send each document to the appropriate folder – all with a few quick taps on your MFP control panel.

PROTECT YOUR DOCUMENTS.

Dispatcher Phoenix's optional Government package comes with a Copy Defender process that prevents the unauthorized copying of sensitive documents. Add Copy Protection features to documents automatically, such as pantograph backgrounds, stamps that mark copies as "Unauthorized," "Illegal Copy," etc., and more.

AUTOMATIC REDACTION.

With Dispatcher Phoenix's intelligent redaction, confidential information is automatically and permanently removed from your document before being replaced with bars, adding another layer of security to your files. For maximum flexibility, redaction search terms can be modified or added right at the MFP panel with ease.

BUILT TO SUIT YOUR **BUSINESS NEEDS.**

The Dispatcher Phoenix family of automated document workflow solutions also includes:

DISPATCHER PHOENIX SCANTRIP

Perfect for businesses of all sizes, Dispatcher Phoenix ScanTrip simplifies core scanning workflows, including extracting data from paper and electronic files, converting documents to searchable PDFs, distributing documents to popular cloud applications, and more.

DISPATCHER PHOENIX RELEASE2ME+

As a convenient and secure follow-you print solution, Release2Me+ enables organizations to further secure their print and scan-to workflows while utilizing OCR capabilities for data extraction and document conversion.

DISPATCHER PHOENIX

An advanced document processing and workflow automation solution with sophisticated tools for rules-based file distribution. In addition to the Government package, a variety of optional vertical market packages can be added onto the Dispatcher Phoenix license, including:

Legal: Speed up and simplify legal document processing with automated Bates stamping, redaction, connectors to document management systems and more.

Finance: Capture, process and distribute financial documents with automated file conversion, advanced OCR and more.

Education: Advanced features for educators include an automated bubble sheet grading solution, a web-based bubble sheet generator tool and more.

ECM: Manage unstructured content with powerful batch scanning and indexing capabilities. Features a Desktop workstation that connects to any high-speed, TWAIN-based scanner, along with web-based batch indexing, document verification and batch reporting tools.

Healthcare: Advanced document workflow for processing, sharing and securing patient information, including a direct connector to OnBase® by Hyland, a secure prescription print solution and Scan-to-EHR capabilities via HL7 Connector and CDA Generator.

MORE WORKFLOW **FLEXIBILITY**

Modular Add-On Options

Dispatcher Phoenix is scalable, allowing you to add additional features once your business needs change. Options include forms processing, document classification, barcode processing, redaction, advanced job routing and much more.

Multiple Connectors Available

Other connectors to popular content management systems and Cloud storage service solutions are available, including: Box.com, Dropbox, FileAssist, Google Drive, Laserfiche, M-Files, Microsoft SharePoint, OnBase, OneDrive, OneDrive for Business, SharePoint Online, WebDAV, Workshare, Worldox.
