Speed Your Information Flow with OnBase® by Hyland

connect

Integrate. Are you finding that you need instant access to information in today's competitive business environment? Can you manage your content with speed? With flexibility? Are you equipped to make critical decisions and provide best-in-class service while maximizing productivity?

With Konica Minolta's global strategic partnership with OnBase by Hyland, you can take advantage of the strength of an enterprise content management (ECM) system combined with the power and technology of our award-winning bizhub® MFP solutions. Konica Minolta's seamless integration with OnBase allows you to scan, index and upload files directly into OnBase, using an on-premises or cloud deployment.

OnBase integration automatically leverages your bizhub MFP—streamlining redundant processes that take up too much time, increasing business efficiencies that save time and money. Konica Minolta's innovative ECM solutions give shape to your ideas and help you meet the ever-changing demands of today's business workflow challenges.

Hyland Software and OnBase are registered trademarks of Hyland Software, Inc., in the United States and other jurisdictions.

OnBase
by Hyland

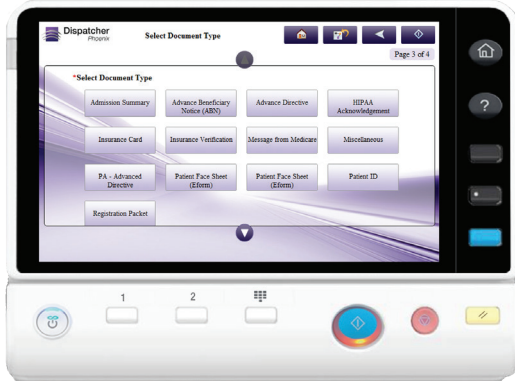

Giving Shape to Ideas

Connect.

Now, with Konica Minolta OnBase Connectors, scanning, indexing and storing critical information into OnBase is faster, more convenient and easier than ever. To best suit your business needs, Konica Minolta has developed two different connections to OnBase: one that allows for basic integration from the MFP and another that is feature-rich, providing advanced processing through automated workflows.

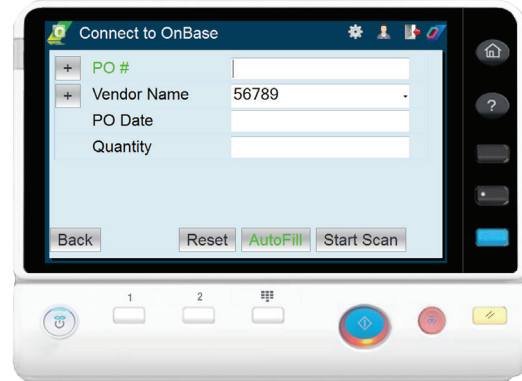

Dispatcher Phoenix OnBase Connector

Dispatcher Phoenix, Konica Minolta's automated workflow software application, is designed to streamline time-consuming, manual handling of documents. Now, with the addition of the Dispatcher Phoenix OnBase Connector, you can increase the power of your workflow by sending processed files directly to where you need them in OnBase. Routing to OnBase can be set up as an automated workflow, or you can access your OnBase workflow directly from the MFP display panel. Log into your OnBase account, choose a document group or scan queue, enter keywords for indexing and scan your documents into OnBase—all without ever leaving the MFP. With Dispatcher Phoenix's advanced capture features, files can be collected, scanned, recognized, indexed and processed before being stored in OnBase. You can convert scanned image files to Microsoft Office or PDF formats, Bates stamp files, OCR documents for zonal extraction, redact-sensitive information and more.

bizhub MarketPlace® Connect to OnBase App

Another option for connecting to OnBase involves using one of Konica Minolta's cutting-edge bizhub MarketPlace apps. Similar to apps used on a mobile device, but specifically designed to be used on the MFP display panel, bizhub MarketPlace apps are easy-to-use applications designed to streamline workflows, improve productivity and enhance the MFP user experience. The bizhub MarketPlace Connect to OnBase app provides you with a simple and cost-effective yet powerful and easy-to-use way to log into OnBase. You can choose an organizational type for your file (document type group or scan queue), enter keywords for indexing and scan files directly into OnBase—with no additional software required. Just tap on the Connect to OnBase icon in the bizhub MarketPlace and you're on your way.

KONICA MINOLTA: GIVING SHAPE TO IDEAS.

Konica Minolta Business Solutions U.S.A., Inc. is a leader in enterprise content management, technology optimization and cloud services.
