

Installing Custom Packages

To install custom packages in Dispatcher Phoenix, follow these steps:

1. Open the **Add-In Manager** (accessed from Windows Start Menu > Konica Minolta > Add-In Manager folder).
Note: Make sure you are running Add-In Manager as an administrator. Select the **Run as administrator** button if it is visible.
2. On the Add-In Manager, enter **Ctrl-Shift-D** to enter troubleshooting mode. The Add-In Manager should now resemble the following illustration:

3. Select the **Install Custom Packages** button.
4. Using the Select Packages window, navigate to the file(s) that have been provided for you to install. Select the appropriate file(s); then select the **Open** button.
5. Select the **Yes** button on the confirmation message that appears.
6. When the packages have been updated, click the **Close** button; then close the Add-In Manager.

The custom packages are now installed.
